

# Acceptable ICT use for Children

In all school activities Heathlands Primary School will encourage and support children, staff, suppliers and visitors to be responsible global citizens. We will be economical with energy, heat, light and paper and consider the impact of their activities on the school and its finances, on the community and on the wider global environment.

## Keeping safe on the computers

1. We will only use the computers in the way we have been told, which includes not giving out personal information.
2. We will only log on to our own or our class accounts.
3. We will only go on the internet when we have been told we can and when we are being supervised by a grown up.
4. We will only go on the sites that we are supposed to and are to do with the subjects we are researching.
5. If we see something that is not suitable (e.g. bad language, something rude) we will tell a teacher immediately.
6. If we see or know of someone else breaking any of these rules we will tell a grown up.
